## Measurement Suggestions

1. **Waist**—Measure the smallest part of the waist. Leave a tape or ribbon tied snugly around the waist while taking other measurements.
2. **Hips**—Measure the fullest part of the hips. Also record the distance from the waist down to the tape, located at the fullest area.
3. **Abdomen**—Measure about 3–4 inches below the waistline over the fullest part of the abdomen.
4. **Thigh**—Just below crotch, around leg.
5. **Knee**—Measure around knee with knee slightly flexed.
6. **Calf**—Measure widest part below knee.
7. **Instep**—Measure around heel over the instep. This measurement is necessary for narrow tapered pants. Be sure to allow enough room for the foot to slip through.
8. **Side length to knee**—Measure from the waist to the knee.
9. **Side length**—Measure from the waist to desired length.

## 10. Crotch

- a. **Depth**—Sit on a flat chair, bench, floor, or table. Measure from waist to top of flat surface.
- b. **Length**—Determine measurement from front waist to center of body and from center of body to back waist.
